**Short bio of yourself**

My self Rohit Chavan, I am working in IPG Team Dynamic as a Front-end Developer. I have totally 8 years experience in Digital World. Focused on creating clean, robust code with exceptional security. Achieves compatibility targets while meeting and exceeding clients demands.

Basically, I am working with BMW Japan Team as well as India team as per requirement. Here main work is handling UI improvement on CMS tool, Creating web page, Landing page, E-mailers, Responsive designs. Some new technology comes then I have learned after that start work on that when I realized then I good experience in this then i will teach or help to other people to involve in the same technology.

Right now, learning React and Angular JS from online courses, with basic start to create app. I happy to learn or work on coding and improve it my self with new technology.

**Brands you have worked on**
